

non-surgical hair replacement

Invisi Hair Advanced Pulse Laser Hair Restoration Machine: Model 60E

Features:

World leading variable pulse Low Level 'Cold' Laser Light Machine

7 inch easy to use touch screen

120 wide diodes - main laser head

Built-in safety switch off facility

MP3 music and video player and USB port built-in

CE certified

Free eyewear protective goggles

Minimum skin contact with instrumentation

Well researched technology

Mobile housing for machinery

Scalp Actions:

Improved blood, oxygen and nutrient supply for accelerated healing. Use for pre and post transplant surgery; for treatment of some scalp diseases, or for hair regrowth

Increases collagen fibre regeneration and melanin for stonger shafts and intense colour

Increases ATP activity boosting the immune response

Kills pathogens, ie, bacteria; fungal infection; and mites

Regulates oil secretions
No known side effects to treatments

Low risk of cross infection

Painless for the scalp because of 'cold' light, no heat etc.

Enhancement Instrumentation:

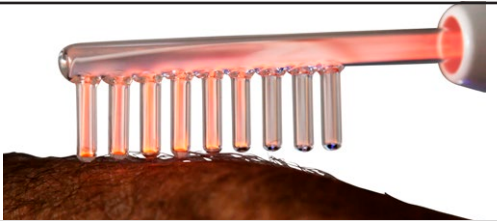

- Built-in Scalp Analysis Instrument with Display
- Air Brush with Compressor for Topical Applications
- Electro Bio Therapy Probe Instrument
- Neon Electro Hair Stimulation Comb Instrument

** Attractive profit margin achieved after treating only 1-2 clients in the clinic/salon.*

Provide
Certified
Hair Laser
Training**

<p>Mobile housing unit 7 inch touch screen Electrical outlet points for all instrumentation. USB Port</p>	
<p>Red Light Bio-Pulse Probe 3 intensity modes (A;B;C) Variable voltage intensity on main control panel</p>	
<p>Main Laser Head: Rapid pulse 'cold' light technology in red spectrum 120 wide scan diodes 650-810 nanometre wavelength</p>	
<p>Mains power supply lead</p>	
<p>Instruction Manual Contains full instructions for use; safety advice; medical usage information; and technical specs.</p>	
<p>Changeable Fuse Chamber</p>	
<p>Neon electro-stimulation comb with intensity adjustment knob on comb handle.</p>	
<p>Topical hair product spray gun + plastic tubing for attachment to main casing Screw top barrel for topical products Lever for spray intensity</p>	
<p>X200 magnification hair analysis lens device with still frame capture button</p>	

Voltage	110-240 V
Frequency	50-60 HZ
Packing Size	114x59x59 cm
Weight	25Kg
Wavelength	650-810 nm variable
Laser Head	True pulse laser diodes
Display Screen	7 inch Digital touch screen
Lens	X 200 magnification
USB	MP3/MP4 player port
Maintenance (None Required)	Parts available at trade prices
